MATH 241/251A
DIFFERENTIATION GATEWAY EXAM

As a student in this calculus class, you are required to pass a differentiation exam. The sample exam on the back of this sheet, as well as the actual differentiation exam, contains 6 questions. To pass the exam, you must answer at least 5 problems correctly. Only clear and unambiguous answers will be accepted. You must pass the exam to receive a grade of C, or better, for the calculus course. If you do not pass the exam, then your grade will be a C-, at best.

The first testing period for the differentiation exam will be IN CLASS during the week of October 1 through October 5, 2012. Students who do not pass the in-class exam have the opportunity to re-take the test once each calendar day, from October 9 through November 5, 2012. A schedule showing dates/times/locations to retake the differentiation exam will be posted on the bulletin board outside KELLER 401A and on the Mathematics Department calculus webpage: http://math.hawaii.edu/calculus. No more than 15 students will be allowed in the exam room during each one-hour testing period; students will be seated on a first-come, first-served basis. A UH Mānoa Student ID is required to enter the exam room.

The exam will be corrected immediately, and you will know your score before leaving the exam room. If you pass the exam, then the exam will be forwarded to your instructor. If you do not pass the exam, the exam will be returned to you. You may review the missed problems with the exam proctor. Please speak with your calculus instructor if extenuating circumstances prevent you from passing the exam, as your instructor has the final word if there is a grading dispute.
