Math 241 — Calculus I

Instructor: John Marriott filling in for Prof. Mickael Chekroun

Office: Physical Science Building 320 (PSB is connected to Keller Hall by a walkway)

Office Hours: MWF 9:30–10:30 a.m., and by appointment.

Text: University Calculus by Joel Hass, Maurice Weir, and George Thomas.

Recitation: It is important to attend recitation sections. Grade-influencing announcements will be made there that are not made in class. Homework will be collected in recitation (except in some cases, e.g. involving holidays, that will be made known).

Filling in: I am filling in for Prof. Chekroun. When he takes over the class, all aspects of the course may change, and as such I am announcing very little about the course (grading, dates of exams, &c). Until things are finalized, please refer to Prof. Guentner’s website for course information. Overall, this course will be very similar to that one: http://math.hawaii.edu/~erik/course/hawaii/s11/241/
