- enjoyed class for the most part, lectures taught thoroughly.
I had problems with some of the notation on exams.
After working all of the problems in the text, I was used to seeing certain wordings and notation. I would have liked some practice questions given that weren't from the text to get used to the different types of questions.

Very good examples and explanation. Nothing bad to say. Very good professor and a nice guy. Never went to his office hours but when I emailed questions he answered them quickly & completely. Good class & professor.

Can't really understand what he speaks. His voice is too raspy and too soft!

Teaching style is alright

Would speed through examples and when finished would find a mistake, but not really correct it, so lots of times it was very difficult to follow his problems that he sped through.

Worked through things extremely quickly when first giving the information

I found the class was set up very well. Exams were fair and so were quizzes. Lectures were good also, although sometimes they did get a little confusing and I needed to read the book to clear it up.

Very knowledgeable, nice dude
Tests are good
Homework is good
Quizzes are good
Well organized and has a positive attitude towards teaching.

- very good knowledge of subject area
- good teacher, good teaching methods
- gives clear instructions on exams
 - criteria covered is explained ahead of time
- ~~the~~ only criticism → could get tests back a little earlier.

Explains theorems well, but I wouldn't spend so much time on those.
As a student, I'd rather see the examples of the theorems used pounded
into my head, so I know the "path way" of solving each problem
better. I think you're one of the best math professors I've had
here.

Taught pretty well, liked the quizzes based on the homework.
A few more handouts might have been nice.

I think that by the scores that were shown of my classmates for the tests, the generally curve of the A,B,C,D's we high. Half the class didn't pass according to the scale given. I also thought that the quizzes and homeworks didn't help much because the tests were a little different, asking something else.

The class was pretty good. The lectures were very helpful, although it wasn't too interesting. The book was a good follow-up to the lectures. Exams were okay but too rushed. There were too much things to do in such a little amount of time. The homeworks were helpful with understanding the material. All in all it was a good class.

For some reason I had a significantly harder time in this course than in 242. The tests for this class are, to me, much harder than tests I've seen in another 243 class this semester. I wish that the homeworks and quizzes, and class examples, would prepare us better for the level of difficulty of the exams.

Instructor PROF DAVID ROSS

Course and Section no. MATH 243

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

I very much appreciate the time and effort Dr Ross puts into the material and the students. The amount of time he spends in order to ensure that students are as prepared as possible is incredible.

- we know exactly what to expect and what to learn
- grading is extremely fair, if not lenient (sp?), based on the amount of effort student puts in
- Prof makes himself available for questions, concerns, comments
- material is covered thoroughly and in many different ways so there is a complete understanding of what is going on

Prof Ross is literally the best math teacher I have ever had and I really appreciate that.

Thank you very much for everything.

Throughout the semester, I felt that the course conducted by Dr. Ross was fair in terms of lecture, HW, quizzes, exams and grading. The lecture pace was good. (NOT too fast, NOT too slow). HW questions were doable and some challenging. Exams were fair because I could show what I had learned till then. I liked the Stewart Textbook b/c of its good explanation. I

Overall, Dr Ross was great prof and my math level has definitely gone up.

I thought that the Exams were challenging and maybe too lengthy for the given amount of time to complete it.

The homework quizzes were okay if you did the homework although I think he should have collected homework. Lectures were helpful.

He spoke clearly, but had trouble doing problems assigned for homework if we asked him to do it.

Overall, I think that the instructor was okay.

Maybe a bit too conceptual in your lectures in that ~~the~~ in explaining how to do things, ~~as~~ I couldn't understand the terms you were using to explain.

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

DR. ROSS KNEW HIS SUBJECT VERY WELL. HE WAS VERY ENTHUSIASTIC ON HIS TEACHING, WHICH IS GOOD BECAUSE MATH LECTURES ARE GENERALLY BORING. HE SEEMED TO UNDERSTAND HOW IT IS TO BE A STUDENT BECAUSE HE WAS VERY FAIR IN HIS GRADING. HOWEVER, IT WAS VERY DIFFICULT FOR ME TO LEARN ANYTHING DURING HIS CLASS BECAUSE I WAS TOO BUSY COPYING DOWN NOTES. IF THERE IS ANYTHING TO SUGGEST, I WOULD SUGGEST THAT HE MAKE A PAMPHLET FOR THE CLASS, COVERING ALL EXAMPLES. IN THAT WAY, I WOULD BE ABLE TO ACTUALLY LISTEN TO HIM.

R.S. DON'T USE THE OVERHEAD, I LIKE SEEING HOW YOU WORK OUT PROBLEMS IN THE BOARD.
