Rudin is very terse but the instructor and the text combined really worked well. Motivated many of the proofs and techniques used in the text. Also provided alternative methods of looking at some of the theorems.

Looking forward to taking Math 432

I like the book for this course, I also like that you give alternative proofs to theorems from the book. Sometimes you go a little fast, but you are also willing to stop & back track so it's not a problem.

Also you give the right amount of hw not too much to turn in and not too little to study with.

*Completed questionnaires will be given to your instructor after final grades for the course have been assigned. You are not expected to sign this form.

Instructor Prof. David Ross.

Course and Section no. MATH 431 Sec. 1

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

- The homework review was very useful. Makes studying for the exam less painful.
- It seems like other real analysis instructors ask the class to memorize certain theorems. I wonder if it would be necessary for us to memorize those theorems for the future.

*Completed questionnaires will be given to your instructor after final grades for the course have been assigned. You are not expected to sign this form.

Instructor Dr. David Ross

Course and Section no. Math 431

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

Dr. Ross comes to class each day prepared & ready to teach. He writes the daily seminar on the board too. I really like that.

I really like when we go over the homework in class. I do problems in class, because I have trouble understanding the books' examples sometimes.

I hope that we can go over more problems in class next semester.
