Dr. Ross's series in Real Analysis is a great course I have ever taken. It paves the road for my future study and research. The class notes are very clear. The instructor strengthens the rigorousness and analysis skill, which is the foundation for any serious research in any fields related to mathematics. It helps me a lot as I am not a professional in math.

The instructor is very comfortable with the material & his lectures are well organized to ensure that the basic concepts are presented. The homework assignments had a wide range of difficulty which made the course frustrating at times but overall effective.

Homework was excellent! I actually see nothing wrong with problems that may have counterexamples. It exercises our skills.

I really enjoyed the way all the material was presented. I went into this class a year ago having Analysis and I'm leaving this class wanting to see more of it. Dr. Ross did an amazing job.

His lectures are clear and well presented. A different book for some of the sections, or problems may have been nice.

I feel well prepared for my camp, particularly in topology. Jumping around in the book was a bit difficult but perhaps necessary. I would complain about the book due to its numerous errors (surprising for a 3rd edition), but I get the feeling all the others have equivalent difficulties.

Instructor Prof. David Ross

Course and Section no. MATH 632

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

We covered a lot of ground. It was well organized and Prof. Ross has wealth of knowledge on the topics for this course. I learned quite a bit; I can always use more hw. problems, specifically on linear fields and Banach spaces - even though they might be easy. Then again can always find my own.

Instructor Poss

Course and Section no. Math 632

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

Strengths - organized!
mostly clear

Weaknesses -

- doesn't often give motivation
- poor time-management
- gives homework problems without checking that the statements are true!
