Really interested in material. Sometimes seemed a little disorganized, but the homework sets were full of appropriate problems (though a little tough at the beginning).

Course and Section no. 671

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

Course was instructive as it helped solidify
concepts from 631 & 632.

The end of the course felt rushed. Wanted for more time
to understand matrix games.

The instructor was comprehensive & knowledgeable.
Sometimes hard to ask questions, but did what he could.
Wish there could be some continuity regarding
instructors for 672, but can't be helped.

Course and Section no. Prob. Theory

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

It was my best class in graduate school.
I learned alot and I enjoyed the class.
I liked the way that you started the class
with kind of a more pure approach & then
you finished it with teaching more applications...
Thank you.

Dr. Ross presented the material in a clear, understandable way. He always gave useful feedback on the homework and exams, and it was clear that he cares about our mathematical writing. I learned a lot and had a great time. THANKS Dr. Ross!

Course and Section no. Math 671

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

Dr. Ross's lectures were always very clear + well-organized. I enjoyed coming to class + learning from him. He was usually very quick to respond to questions/emails.

The homework was definitely challenging, but interesting at the same time.

Sometimes we felt overwhelmed with the amount of work, so maybe a break once in a while between assignments would have been helpful.

Otherwise - great class.

Overall good class. Covered material in detail, though I wish there was a little more insight given.

Needs better choices of variables sometimes.

Seeing $E(X)^p = \int p(x)^p dP$ is rather confusing.

Dr Ross teaches the class well;

I enjoyed his enthusiasm with this specific course,

I also liked the balance between viewing probability from a mathematical point of view, and a probability point of view as well.

He did a great job of making the class self-contained, explaining content from other courses when necessary.
